About me

I am a student at Reykjavik University finishing a BSc in Computer Science. I have focused on game development but am also interested in many other fields. In the past year, artificial intelligence has fascinated me as I have taken courses in it.

I enjoy working in a group and find it easy to work independently. I have various hobbies, such as game design, programming, Dungeons and Dragons, painting miniatures and playing the Piano.

Academia

Reykjavik University - BSc. Computer Science (Game Development)
